Registering pay-as-you-go systems

Support from NetApp is included with Cloud Volumes ONTAP Explore, Standard, and Premium systems, but you must first activate support by registering the systems with NetApp, if you have not set up automatic registration.

Before you begin

The host from which you are logged in to Cloud Manager must have internet access. If it does not, you can register from another location by going to [NetApp Cloud Volumes ONTAP Registration](#).

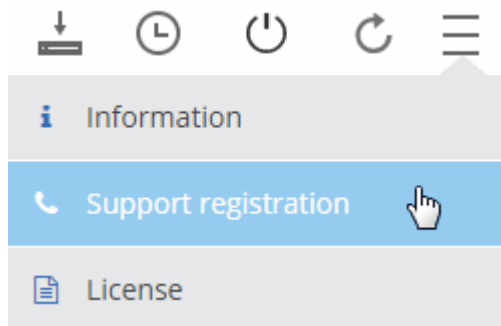

About this task

If a tenant is linked to a NetApp Support Site account, Cloud Manager automatically registers the system with that account. However, if the tenant is not linked to an account, then you should register systems with NetApp after you launch them.

For instructions, see [Linking tenants to a NetApp Support Site account](#).

Steps

1. On the Working Environments page, double-click the name of the system that you want to register.
2. Click the menu icon and then click **Support registration**:

The information that you need to register an instance is displayed:

- Instance ID
 - Serial number
 - Account ID
3. To automatically register future instances in the tenant, click the link to enter your NetApp Support Site credentials.
 4. To register this instance with NetApp support, click the link and then click **Register to NetApp support**.

Following this link automatically completes the instance ID, serial number, and account ID in the registration form.

5. Follow the instructions to register your Cloud Volumes ONTAP system.
