

Installing Cloud Manager in an Azure Germany region

The Azure Marketplace is not available in the Azure Germany regions, so you must download the Cloud Manager installer from the NetApp Support Site and install it on an existing Linux host in the region.

Steps

1. [Review networking requirements for Azure.](#)
2. [Review Cloud Manager host requirements.](#)
3. [Download and install Cloud Manager.](#)
4. [Grant Azure permissions to Cloud Manager using a service principal and credentials.](#)

Managed Service Identities are not supported in the Azure Germany regions.

After you finish

Cloud Manager is now ready to deploy Cloud Volumes ONTAP in the Azure Germany region, just like any other region. However, you might want to perform additional setup first.
